- Optimized for Mobile and PC Projects

Getting Started

For the best experience, please check the:

URP > Prefabs

A large number of prefabs have already been set up and are ready to drag and drop into your scene. The prefabs include different plant and pot color combinations to help speed up your workflow.

Features

- Game-ready prefabs
- 20+ different pot colors
- Lightweight and optimized models
- Suitable for stylized and low poly games
- Easy to customize

Support

If you encounter any issues or have suggestions for future free assets, feel free to contact me through my publisher page.

Enjoy creating with this pack!

Notes

- Designed for Universal Render Pipeline (URP).
- Materials and prefabs are already configured.
